

YARA PILBARA NITRATES — AMMONIUM NITRATE PLANT — COMMISSIONING PLAN

443. Hon ROBIN CHAPPLE to the Minister for Environment:

I refer to works approval W4701/2010/1 for Yara Pilbara Nitrates' ammonium nitrate plant which states, in part, under paragraph 4.1.1 —

The Works Approval Holder shall, at least three months prior to commencing commissioning, submit a commissioning plan for approval by the Director.

- (1) From where is this commissioning plan available?
- (2) If not available, why not; and has it been completed or submitted?
- (3) Has Yara produced a report on scrubber efficiency and ammonium nitrate particulate release for the commissioning process?
- (4) Please table the commissioning plan and associated report from Yara, where applicable.

Hon STEPHEN DAWSON replied:

I thank the honourable member for some notice of the question.

It is not possible to provide the information in the time available, and I request that the member place the question on notice. I am advised that the Department of Water and Environmental Regulation requires the opportunity to obtain advice to ensure that no third party commercial information is contained within the commissioning plan that may be inadvertently released when tabled in Parliament.
