C002

**QUESTION WITHOUT NOTICE
(Of which some notice has been given)**

Tuesday, 13 March 2018

Hon Robin Chappie MLC to the Minister for the Environment

I refer to our meeting of 28 November 2017 in relation to the review by Anthony Sutton from the Environmental Protection Authority (EPA) of current best practice emissions control from the Yara Pilbara Technical Ammonium Nitrate Production Facility, and ask:

1. During the meeting, the Minister indicated that the report will be available in the first quarter of 2018. When will the report be available?
2. If the report is available or when the report is available, will the Minister table the report?
3. Has the Minister received the review and will the Minister recommend either a change in best practice in the current Works Approval or make a recommendation that the EPA to review MS 870?

I thank the honourable member for some notice of this question.

1. I expect to receive the findings of the review in late March 2018.
2. I will table the report after I have received it.
3. I will consider whether any changes are required to the Works Approval or Ministerial Statement 870 after I have received the findings of the review.

Hon Stephen Dawson MLC

MINISTER FOR ENVIRONMENT; DISABILITY SERVICES
