**LEGISLATIVE COUNCIL**  
**Question Without Notice**

**Thursday, 8 October 2020**

**C1063. Hon Robin Chapple to the Minister representing the Minister for Mines and Petroleum**

I refer to the proposed Buccaneer Marine Park and the existence of floating fuel outlets in Dogleg Creek on the south side of Yampi Sound, and I ask

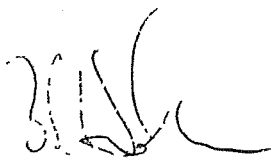

1. Are the fuel dispensary facilities licensed, and if so by whom?
2. If not to (1), why not?
3. Will these licensed or unlicensed facilities be allowed to remain, once the Marine Park is declared?
4. If these facilities are unlicensed, what action will the Government take to ensure they are either licensed or removed?

---

**Answer**

**I thank the member for the question. The following information has been provided to me by the Minister for Mines and Petroleum**

1. DMIRS has no record of licenced fuel facilities in the Buccaneer Archipelago.
2. Licensing is only required if the storage for fuel (petrol) exceeds 10 000 L or combustible liquid (diesel) exceed 100 000 L.
3. The *Dangerous Goods Safety Act 2004* does not preclude the storage of dangerous goods once a Marine Park is declared.
4. Licensing requirements cannot be enforced if the storage and handling quantity does not exceed the licensable quantity
